Experience

Software Engineer

06/2025 – Present

neXDos, GmbH — Munich, Germany

Financial Insights Platform (React.js, Django, Redis, PostgreSQL, AWS)

[Live](#) [🔗](#)

- Optimized **React** rendering with virtualization, memoization, Suspense, and code-splitting improving **Core Web Vitals** scores
- Developed reusable **React** (TypeScript) hooks and components, enhancing front-end scalability
- Engineered a **Python** backend with a layered architecture (DAO/DTO separation), strengthening modularity, separation of concerns, and testability
- Implemented **Redis** caching for dashboards with financial analytics charts, improving API response time by **60%**
- Enforced code quality with **Jest/React Testing Library** tests, achieving **90%+** code-coverage
- Enhanced observability via **CloudWatch** and **Sentry**, reducing incident response time by **40%**
- Reviewed **merge requests** and managed user stories to ensure quality and timely releases

Marketing Web Platform (Next.js, Django, Docker)

[Live](#) [🔗](#)

- Implemented **i18n** helpers at **Next.js** server-side, improving **SEO** score of the marketing app
- Developed highly responsive components with **Material UI** and **Tailwind CSS**, directly improving **UI/UX**
- Established a **monorepo** and shared component package, cutting code duplication by **35%**
- Translated **Figma** designs into pixel-perfect UI using **HTML**, **CSS**, and **Material UI**
- Participated in **weekly scrums** to identify workflow bottlenecks and improve team alignment

Software Engineer

12/2023 – 05/2025

Aideniti — Karachi, Pakistan (Remote)

Boarddd – Collaboration Platform (Next.js, Node.js, PostgreSQL, AWS, Elasticsearch)

[Live](#) [🔗](#)

- Engineered **RabbitMQ**-based **microservices** for async tasks, reducing backend load and improving communication
- Architected a reusable **WebSocket** layer with **custom hooks**, delivering reliable real-time communication
- Decomposed the system into **microservices**, enhancing scalability and accelerating feature delivery
- Integrated **Elasticsearch**, reducing search latency from **2–4s** to **20–50ms**, improving UX across dashboards
- Led a team of **3** engineers to deliver a **B2B SaaS** platform for a **UK** client using **Agile**/Lean practices
- Designed **RESTful** and **GraphQL** microservices on **AWS** (Lambda, ECS, API Gateway, RDS, IAM) with circuit breakers and retries for higher uptime
- Established end-to-end **CI/CD** pipelines with **GitHub Actions** for automated testing, **Docker** builds, and multi-environment deployments, ensuring zero-downtime releases

Software Engineer

12/2022 – 12/2023

Brew Buddy Information Technology — Dubai, UAE (Remote)

Hailo Assure (AEP) – Audit Management System (React.js, TypeScript, Redux, AWS)

[Profile](#) [🔗](#)

- Designed dynamic master audit templates in **React**, customizable for **60+** audit workflows, enhancing reusability
- Configured scalable state management with **Redux** Toolkit for complex async workflows and global state updates
- Managed file uploads and streaming with **Multer** and **Amazon S3**, ensuring efficient document handling
- Created strongly-typed **React** modules in **TypeScript**, improving reliability and maintainability
- Crafted interactive **Chart.js** dashboards for audit parameters, enabling better analysis and decision-making

iTalk2u - Call Centre Platform (Node.js, MySQL, PostgreSQL)

[Profile](#) [🔗](#)

- Delivered high-performance **REST** APIs utilized by **10K+** remote agents, streamlining onboarding and training

workflows

- Secured the authentication layer using **JWT**, refresh tokens, and HTTP-only cookies, strengthening session integrity

Education

Universität Passau, Germany

Apr 2024 – Mar 2026

Master's in Computer Science

(expected)

- **Coursework:** Advanced Software Architecture, Distributed Systems, Machine Learning Systems Design, Deep Learning (NLP)
- **Thesis:** Designed and built a production-grade RAG pipeline over **340+** financial tables (datasets in hundreds of GB, e.g., **S&P**, ESGBook, **Goldman Sachs**) and benchmarked multiple closed-source **LLM** models for text-to-SQL generation

National University of Computer and Emerging Sciences

Aug 2018 – May 2023

Bachelor's in Computer Science

- Dean's Honour List for securing SGPA over 3.9 (**German grade: 1.1**)
- **Coursework:** Data Structures & Algorithms, Neural Networks, Computer Vision, Natural Language Processing

Skills

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React 17+, Next.js 14+, Zustand, Redux, Tailwind CSS, MUI, Chart.js, Jest, React Testing Library

Backend: Node.js, Express.js, Django, Pandas, FastAPI, REST, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Qdrant

DevOps and Cloud: AWS, Docker, Kubernetes, GitHub Actions, Terraform

Languages: English-C1, German-A2 (learning)
